

AWS operates in the utmost compliance with the current standards for a correct Quality Management System.

The Quality Service, in collaboration with the various company managers, issues and revises programs for the definition of:

- what should be the quality of the services and products that is provided to the customer in order to meet their needs and to increase their market requirements.
- what resources and tools should be used by the organization to ensure the successful pursuit of pre-established quality;
- who, within the organization, is responsibly involved in the joint effort to pursue business objectives.

In order to better comply with the quality policy, procedures have been carried out in order support the management of the company reality and to pursue a continuous improvement program, aimed at:

- developing the characteristics of the product for a constant adaptation of market needs;
- improving customer service;
- resolving promptly any anomalies found;
- fulfilling the objectives in compliance with the reference standard (UNI EN ISO 9001:2015).

Therefore, AWS is committed to keep the SGQ updated and effective:

- verifying its implementation in all company's activities;
- providing the quality assurance service with suitable qualified personnel and appropriate equipment to carry out tasks in the proper way;
- giving it the necessary authority to achieve the quality objectives.

The CEO, on behalf of the entire company, recognizes the need to define, maintain and update the SGQ. He undertakes to disclose this quality policy and plan to all collaborators and employees, to pursue with firm will the maintenance and development at all company levels of the objectives pursued and to resolve any possible dispute in compliance with the commitments made with the customer and with the inspection facilities.

The president of CdA
